

## **Student Guidelines for Evolution Evidence Debate, 6/3/17**

- p162: The body of empirical scientific data supports the theory of evolution.
- This is a rewording of the actual resolution on p162. The “not” in the original resolution reverses the sense of the resolution and makes the affirmative/negative teams seem backwards.
- Positive: Evolution
- Negative: Creation.
- Actually, positive team has an easier time. All they have to do is to show the evidence for evolution.
- Negative team has to explain the evidence away.
- DO NOT ARGUE FOR CREATIONIST OR INTELLIGENT DESIGN POINT OF VIEW!
